

Smart Stack — A platform for smart contracts management and maintenance

Arunabh Das

September 20, 2018

Background

The blockchain is a fundamentally revolutionary technology. Smart Contracts are the future.

The true innovation at the heart of cryptocurrencies, the blockchain, is the technology that matters.

The blockchain is creating new opportunities in fintech for banking and financial technology companies across the world.

1 — Tim Draper predicts the market cap of cryptocurrency will reach *80trillioninthenext15years*.

He equates the cryptocurrency market to the internet market. The internet market rose from *10to100* billion market.

The crypto currency market will rise to trillions as it cuts across different industries such as finance, healthcare, insurance,

3 — The BGCI Index (Bloomberg Galaxy Crypto Index) which measures the performance of the large digital currencies traded in dollars, retouched the highs of last year (2017)
